

ENERGY POLICY

In order to protect our world from possible dangers, we use our energy efficiently and set targets to reduce our energy consumption.

Therefore;

- We follow national and international standards, laws and regulations in order to fulfill both our responsibilities towards nature and our legal obligations, voluntarily carry out studies that will reduce energy use and/or continuously improve our energy consumption performance, and follow the results of our work.
- We set targets and include energy efficiency in our training programs in order to ensure the participation of our employees.
- We care about collaborating with all our stakeholders to create common goals and results in energy management. We try to maintain our interaction with our guests, employees, visitors and all our business partners in order to reach a total level of awareness and consciousness on these issues.
- We try to research, find, purchase and use suitable energy-efficient products, equipment, equipment and technology alternatives.
- We aim to document our Energy Management System, disseminate it to all our departments, update it when necessary, review it and continuously improve it.
- We evaluate energy risks or emergencies that may arise such as energy shortages and plan the measures that can be taken.
- We take care to effectively separate our wastes according to their source, groups and hazard classes.
- We know that the use of hazardous substances and chemicals only when needed and as much as necessary will reduce both the negative effects on the environment and the amount of waste,
- We contribute to the protection of nature by choosing those with "recycling" and "environmentally friendly" labels in the materials we buy in our business. We try to create reuse opportunities,
- We take care to use disposable materials such as paper, napkins, toilet paper, packaging as much as necessary and to leave less waste to nature,
- We store the wastes correctly, in separate areas according to their characteristics, and keep their records by delivering them to licensed/authorized companies without exceeding the legal storage time limits,
- We try to use water, energy and all natural resources sparingly. We share this sensitivity with our employees, guests and suppliers.
- We measure our performance in environmental management, monitor this data with targets and try to improve our performance.
- We aim to educate our employees about the environment and increase their sensitivity
