

4. SUSTAINABLE MANAGEMENT SYSTEM POLICIES

All management processes of our business constitute the basic framework of a Sustainability Management System (CMS) that can be developed and reveal its policies.

The basis of our management system is based on risk analysis. Risk analysis is carried out under the headings of environment, natural disasters, society, culture, economy, quality, human rights, health and safety. New titles can also be added if necessary.

We also have a crisis management policy and system that determines what to do if the risks are realized after the risks are analyzed.

The sustainable management system includes the implementation of certain policies by all employees on quality, economy, management, environment, culture, human rights, health and safety, setting targets and continuously improving business management processes by monitoring whether the goals are achieved.

If the determined targets are achieved, new targets are determined. If it cannot be achieved, our goals, policies and practices are reviewed. In this way, we strive to ensure continuous improvement.

Due to the situation of the sector, environmental, social, technological, economic and cultural risks, legislative changes and updates, our management system is constantly reviewed, and systems and policies are updated if necessary.
